PROFESSIONAL SUMMARY

Results-driven Full Stack Laravel Developer with 3+ years of experience in designing, developing, and maintaining scalable web applications and enterprise-grade solutions. Strong expertise in PHP, Laravel, RESTful API development, JavaScript, MySQL, and modern frontend technologies. Experienced in backend architecture, third-party integrations, authentication systems, queue workers, caching strategies, and Linux server deployment. Proven ability to deliver secure, high-performance, and user-centric solutions for both startups and enterprise clients.

EDUCATION

BACHELOR'S DEGREE
INDUS UNIVERSITY AHMEDABAD
2015 - 2018

DIPLOMA DEGREE
SIR BHAVSINHJI POLYTECHNIC
INSTITUTE, BHAVNAGAR
2011 - 2014

SKILL

- Front End
- HTML5, CSS3, Bootstrap, Sass, Tailwind, Blade, AJAX, jQuery, (Alpine Js, Inertia Js, React Js - Vibe Coding)
- Back End
- Laravel, OOP PHP, REST APIs, MVC Architecture, Repository Pattern, Queue Workers, auth
- Database
- MySQL, Query Optimization
- Infrastructure & DevOps
- Git, Linux deployment
- Problem Solving
 - Team Collaboration
 - Client Communication
 - Project Planning
 - Debugging & Troubleshooting
 - Performance Optimization
 - Time Management

KEY ACHIEVEMENTS

BEST EMPLOYEE AWARD - 2025

BEST TEACHER AWARD - 2024

WORK EXPERIENCE

- Email Verification SaaS Platform | Subscription & API Management**
- Developed a Laravel 12 based SaaS platform for email verification and subscription management with separate admin and user dashboards. Built subscription billing workflows, including plans, coupons, credit-based usage tracking, and multi-gateway payments (Stripe, PayPal, Razorpay). Implemented secure REST APIs with token authentication, webhook processing, and API documentation for third-party integrations. Added role-based access control (RBAC), 2FA security, support ticketing, and analytics/reporting modules. Improved code quality and maintainability using PHPUnit, PHPStan/Larastan, Laravel Pint, and ESLint workflows.
- Online Learning Platform | LMS & Workshop Management System**
- Built a modular online learning platform using Laravel 12 (PHP 8.2) with modules for courses, workshops, orders, coupons, certificates, blog, and support. Implemented a multi-role system for Student, Instructor, and Admin with dashboards, instructor approval workflows, and profile management. Developed complete e-commerce and payment workflows, including cart, checkout, invoices, order history, and 8+ payment gateway integrations. Added core learning features such as lesson progress tracking, quizzes, Q&A, reviews, and certificate downloads. Created a responsive frontend using Blade, Tailwind CSS, Alpine.js, and Vite, with real-time support via Laravel Echo and Pusher. Tech Stack: Laravel 10, PHP 8.1, MySQL, Sanctum, Tailwind CSS, Alpine.js, Vite, Stripe, PayPal, Razorpay
- Media Production Project Management System - Backstage**
- What is Backstage? Backstage is a *comprehensive video production management platform* built with Laravel 11. It serves as a centralized hub for managing the entire lifecycle of video production projects—from initial client onboarding and pre-production through to filming, post-production editing, distribution, and launch. The system also includes full HR management, financial tracking, invoicing, sales pipeline management, strategic partnerships, and internal communication (chat) capabilities.
- Sri Vaishnava Matrimony in USA - Svmatrimony**
- Built a full-stack matrimony platform for the Sri Vaishnava community (NRI-focused), covering complete user and admin workflows. Tech stack: Laravel 12, PHP 8.4, Inertia.js v2, React 19, TypeScript, Tailwind CSS v4, MySQL. Implemented secure authentication with OTP (SMS and email), profile lifecycle (create, edit, approval, visibility), and privacy-aware photo handling. Developed matchmaking and engagement flows: search/filtering, weighted compatibility scoring, interests, shortlist, block/report, and event RSVPs. Built a role/permission-based admin panel for user moderation, profile/photo approvals, content and SEO settings, communications, analytics, audit logs, and dynamic dropdown management. Added background processing and quality checks with queue jobs plus broad Pest feature-test coverage.
- SKILLBLOOMER, PERKSWEET, DIVYABHASKAR, ECOMMERCE WEBSITE AND INVENTORY-MANAGEMENT HAVE WORKED IN MORE THAN 20 PROJECTS.
